Masters Form #19 – Passing the Torch 2
Knowledge Capture
May 12-15, 2010
Melbourne, FL
Reflection - Iterative cognitive process: think about experience, examine the underlying beliefs and assumptions that affect how we make sense of the experience, and reach conclusions/implications

Content - Actual experience

Process - Problem solving strategies way to deal with the experience

Premise - Examine assumptions, beliefs and values
Questions

- **Groups 1-6** - What was the most important thing you learned today? Why?

- **Groups 7-12** - How will you use what you learned?

**Process** - (20 minutes)

1. Write down your own answer (reflection)
2. Discuss responses within table group
3. Identify what to share with the whole group; choose spokesperson, and create flipchart to post
Questions

- What were the key lessons learned?
- What assumptions did you challenge?
- What did you/will you change?
