Epistemological Roots of Justification

What are you proposing?

Is it going to work?

How do you know?
How do you know?

- Epistemology
  - The philosophy of knowing
- Ontology
  - The philosophy of meaning
- Explanations of “Why <thing>?”
  - Aristotle’s “Causes”
    - “Why breakfast” (Kineman, 2003) *
      - Material cause – Ingredients, shape (things), the thing first made (phenomenal element), the environment
      - Efficient cause – cooking (process), the chef
      - Formal – recipe (design), the breakfast logistics planner
      - Final cause – one’s hunger and desire to eat (purpose), the desirer

* A lot more complicated definitions than the category titles might connote
Aristotle “Causes” = Explanations

**EFFICIENT**
- Laws of Action
- Cause-effect
- Production
- Manufacture
- Processes
- Action
- Realization

**FORMAL**
- Parameters
- Attributes
- Attractors/Repellers
- Assumptions
- Boundary
- Choice
- Accountability
- Organization
- Agreements

**MATERIAL**
- Objects
- States
- Exercise
- Response
- Behavior
- Environment
- Interaction
- Test
- Outcomes
- Integrity

**FINAL**
- Exemplar
- Protocols
- Truth
- Judgment
- Patterns
- Dialectic
- Goodness
- Integrity

4
Serious Material Cause Issues*

*remembering that lack of validity can be attributed to something in each causal category
Efficient Cause Issues

After eight years France gives up on the project.

Panama Canal

Space elevator
Formal Cause Issues

The Big Dig – Boston Central Artery

Where Formal cause issues often end up
Serious Issues from Final Cause

The Vasa
1628
Static Model → Dynamical Model

**ENTITY**
- Existence of an Entity;
- Reaction of phenomenal things that communicates information about their nature and integrity in their environment
  - Nature
  - Objects
  - Environment
  - Interaction/Test
  - Response/Outcomes
  - Behavior/Integrity

**MATERIAL**
- System Integrity
- Structure
- Implication (encoding)

**FUNCTION**
- Actual
  - Phenomenal
  - Realization (decoding)
  - Laws of action
  - Processes
  - Cause-effect Action
  - Production
  - Manufacturing
  - Realization

**FORMAL**
- Pattern-al
  - Contextual
  - Potential
  - Forming of Systems and Action Plans based on chosen/prioritized parameters
  - Attractors/Repellers
  - Attributes
  - Assumptions
  - Accountability
  - Organization
  - Worth

**MODEL**
- Goodness
- The pattern-al information of Things;
  - Knowledge of Things;
  - Justification of Truth and Selection or Beginnings of Goodness

**EFFICIENT**
- Action of creating phenomenal things
  - Produce
  - Act under uncertainty
  - Choice

**FINAL**
- Individual Worth
  - Value Propositions

**Exemplar**
- Protocol
- Dialectic
- Selection
- Truth
- Goodness

**“Knowledge Soup”**
Partial Model of Closure to Final Cause

- **Actual Phenomenal**
  - Efficient Fabrication of Entity
  - Material Test, Integrity of Entity

- **FUNCTION**
  - Formal Forming Entity (values, decisions, agreements)

- **MODEL**
  - Final Judgment of Truth, Validity of Propositions, Inferences, Assumptions, Conclusions, Predictions
  - Final – Model Truth, Validity

- **FUNCTIONm**
  - Formal – Model Forming Hypotheses (information suppression and expression; with values)

- **MODEL of Model+Environment**
  - Contextually Efficient Model Building
  - Contextually Material Exercise Model

- **STRUCTURE**

- **STRUCTUREm**
Research in How We Know

- Not focused on what we know
- Culture knobs not being turned now
- Accountability for solutions
- Case studies that illustrate authority accountability influencing go-no go decisions
Questions?
BACK UP
Most Succinct Causal Categories Explanation from Philosophy Sources

<table>
<thead>
<tr>
<th>EFFICIENT</th>
<th>FORMAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>the causer of the action or the “triggering action or motion that begins the thing”; 1) “That from which, although not present in it, a thing first comes into being, and that from which motion and change naturally first begin, as the child (an entity) comes from the father and mother (action of other entities), and fighting (an action) from abuse (another action).” 2) The source of the first beginning of change or rest; e.g. the man who plans is a cause, and the father [and mother are] the cause of the child, In general that which produces is the cause of that which is produced, and that which changes of that which is changed.</td>
<td>the forming of the thing, or what triggers the form; 1) “That in accordance with whose deliberate choice that which is moved is moved, and that which is changed is changed; such as magistracies, authorities, monarchies and despotisms” 2) the form or pattern; ...the essential formula and the classes which contain it the ratio 2:1 and number in general is the cause of the octave—and the parts of the formula</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>MATERIAL</th>
<th>FINAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>The entire material being of a thing; its shape, constitution, and phenomenal existence; 1) “That thing as a result of whose presence something first comes into being; e.g., as the keel is the beginning of a ship, and the foundation that of a house, and as in the case of animals some thinkers suppose the heart to be the “beginning,” others the brain, and others something similar.” 2) the bronze of a statue and the silver of a cup, and the classes which contain these</td>
<td>“the ultimate purpose or goal for which the thing exists” (the purpose); “Beginnings” (‘Cause’ can have a similar number of different senses, for all causes are ‘beginnings.’) ‘beginning’ means the point from which a thing is first comprehensible, ... the hypotheses of demonstrations. Arts, ...especially the architectonic arts. 2) The same as ‘end’; i.e. the final cause; e.g., as the ‘end’ of walking is health. For why does a man walk? ‘To be healthy,’ we say ... All those means towards the end which arise at the instigation of something else, as, e.g. fat-reducing, purging, drugs and instruments are causes of health” 3) “the Good and the Beautiful”</td>
